Summary

Computer Science student at Griffith College with hands-on experience building full-stack applications using the MERN stack. Passionate about developing scalable and user-focused solutions through practical academic projects involving REST APIs, authentication systems, and responsive interfaces. Strong adaptability and problem-solving skills developed through leadership experience in fast-paced professional environments.

Education

2023 – 2027

GRIFFITH COLLEGE

Bachelor's in Computer Science
Dublin, Ireland

2024

UNYLEYA

Diploma in Public Management
Completed 2024 | Brasília, Brazil

Work experience

2022 – July 2026

Team Leader / Kitchen Operations Coordinator
Oxmantown Dublin – Ireland

- Promoted from kitchen assistant to commis chef by consistent performance.
- Led daily operations, including team supervision, stock control, and compliance with food safety standards.

Skills

- | | |
|---|--|
| ✓ Java, Python, C++ | ✓ Leadership, Adaptability, Problem Solving, |
| ✓ JavaScript, React, Node.js, MongoDB, Render | Team Collaboration |
| ✓ Linux, Windows, Git/GitHub, AWS, MySQL | ✓ Adaptability to New Technologies |

Languages

Portuguese: native

English: **C1**

Spanish: **A2**

Real Estate Management Platform | MERN Stack Project

- ✓ Developed a full-stack real estate management application using React, Node.js, and MySQL.
- ✓ Implemented RESTful APIs for JWT authentication, property CRUD operations, and advanced search filters.
- ✓ Optimized database queries using connection pooling, reducing website response time.
- ✓ Created a responsive user interface using React Hooks and reusable components.

Kitchen Guardian project – Raspberry Pi IoT System

- ✓ Developed a kitchen monitoring system using Raspberry Pi.
- ✓ Integrated sensors (temperature, leak detection, etc.) for real-time data collection.
- ✓ Created Python scripts for automation and data processing.
- ✓ Developed a dashboard for data visualization and monitoring.
- ✓ Implemented alert systems for critical situations (e.g., abnormal temperature levels).
- ✓ Applied embedded systems and automation concepts.
